

MAKING SPACE FOR WILDLIFE AND RECREATION

You are playing in the home of bears, elk, and moose. Dawn and dusk are the most likely times for wildlife encounters, leading to stress on the animals and risks for people. For the safety of both wildlife and trail users, please be aware of best practices and use trails during daylight hours.

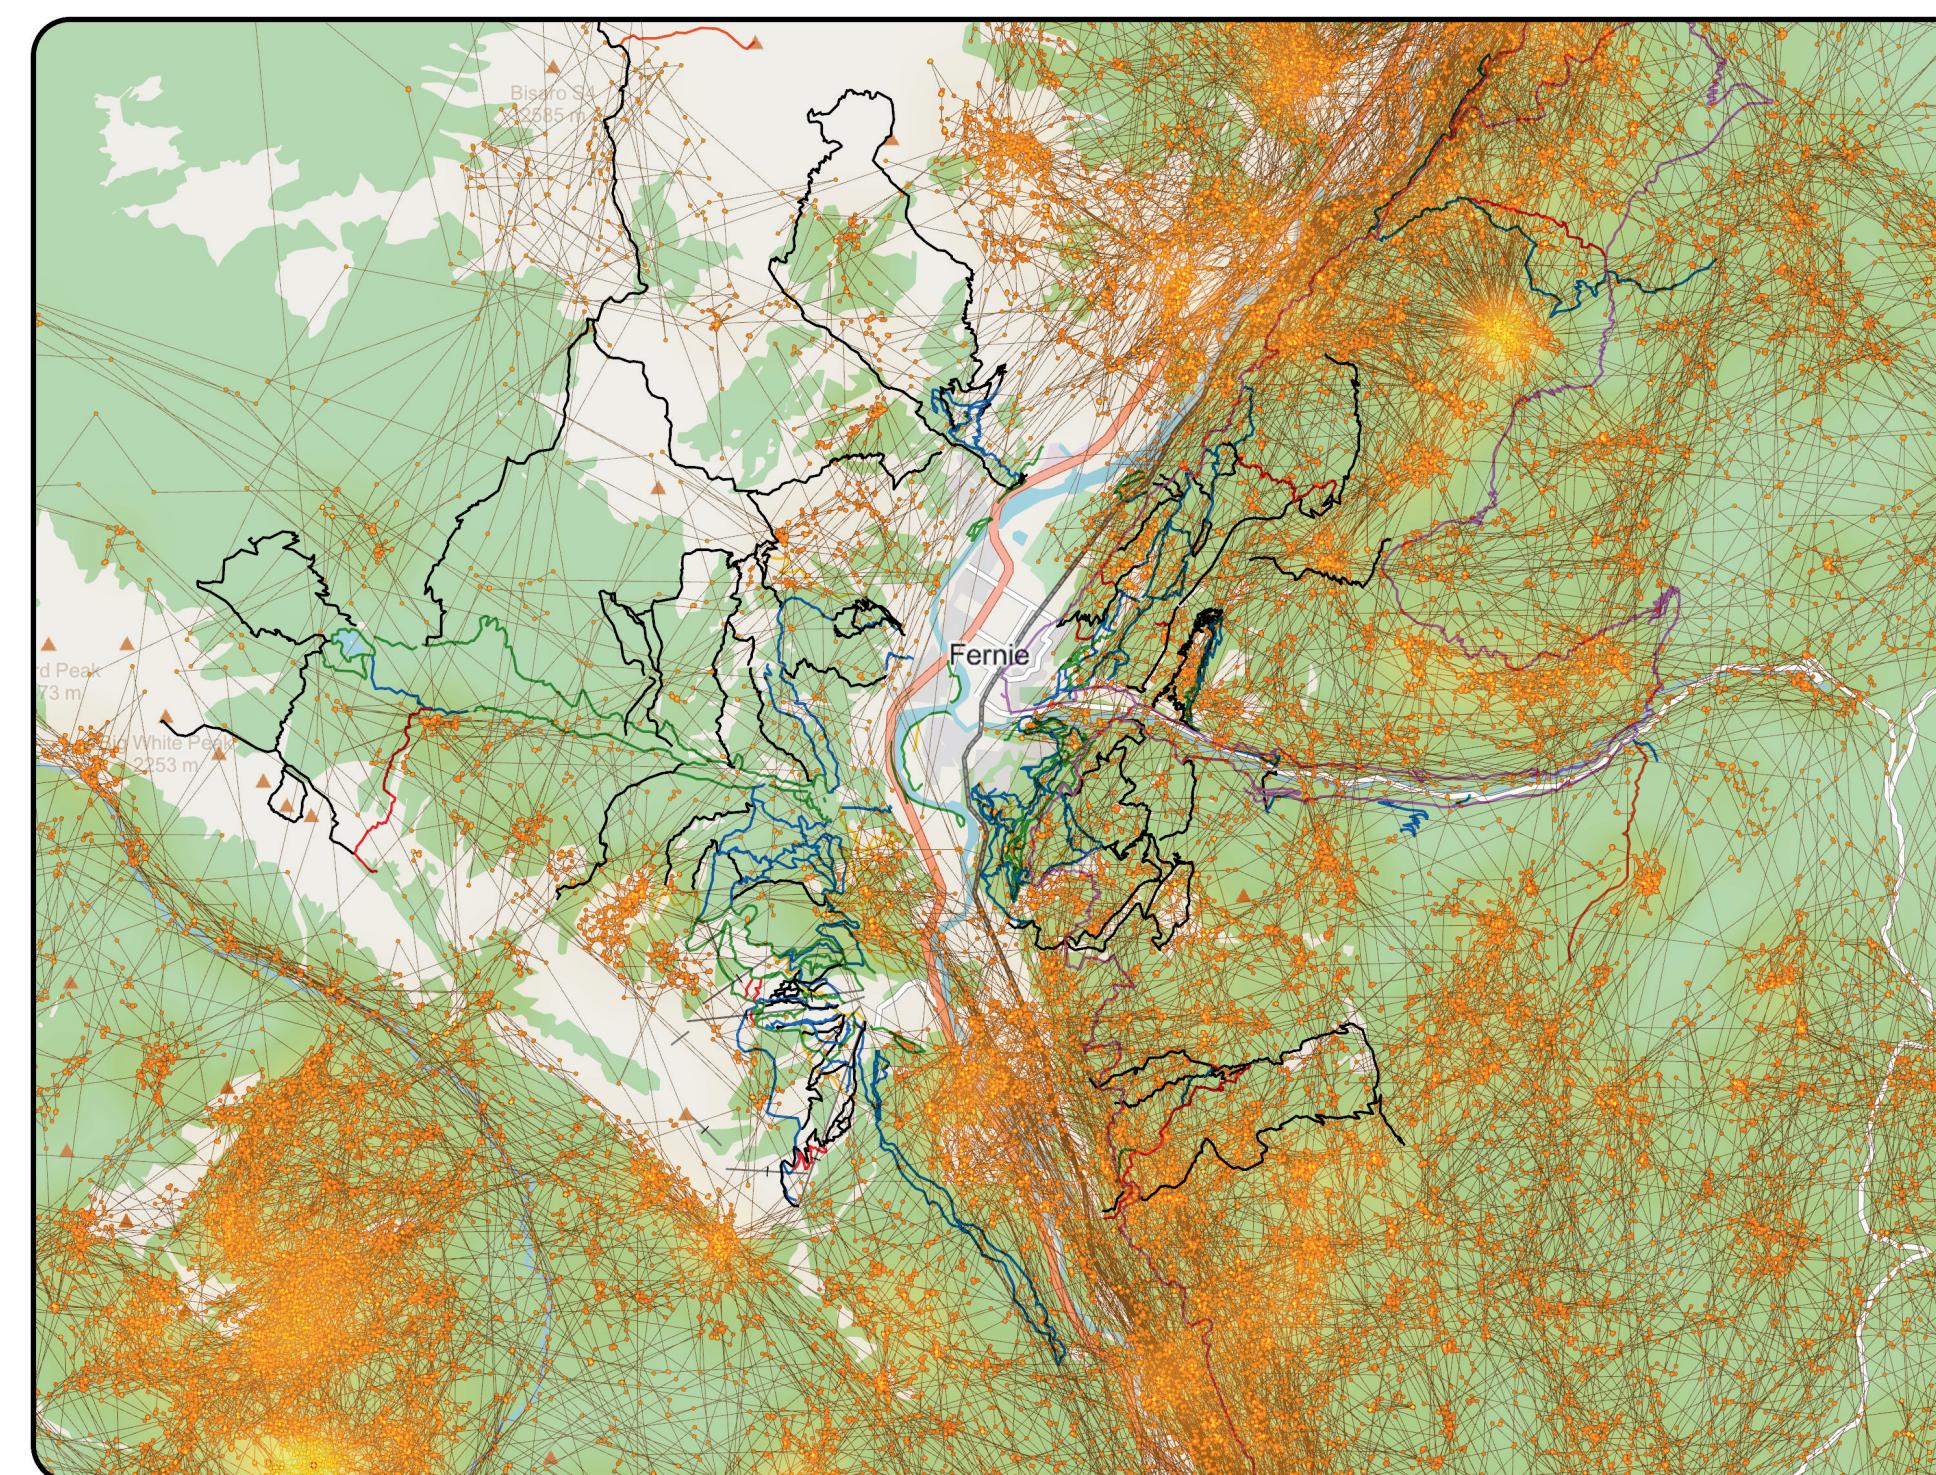

Bike & Wildlife Trail Use in Fernie

Dawn and dusk are the most likely times for wildlife encounters.

Grizzly Tracking Data

Most of the trail network is used by grizzly bears. Make noise OFTEN.

GPS data collected from ~20 collared grizzlies, with location point every 2 hours. Each dot is a location and the lines show location sequence.

How Can You Reduce Conflict?

- ✓ Prioritize using the trails 9am - 7pm during summer months. **Avoid dawn and dusk.**
- ✓ Animals are everywhere in Fernie. **Make noise often.**
- ✓ Stash your trash and store your snacks properly. **Never feed wildlife.**
